

AeroFIS® –

Safety First

The fully automatic AeroFIS® incorporates the latest technology, advanced features, proven integrity and extended flexibility for future expansions

All NAVAids and flight procedures that need calibration or validation can be inspected by AeroFIS®

AeroFIS® – Setting the Standard in Flight Inspection

Key Features:

- Highest accuracy and integrity leading to reliable flight inspection results
- Proven reliability and availability all over the globe
- Customized solutions for hardware and software
- Simultaneous multiple facility calibration
- Special features for military and civil customers
- System technology constantly improved by own flight inspection service (AeroPearl, Australia)

AeroFIS® — Fully Integrated Crew Concept

Profit from improved Crew Coordination:

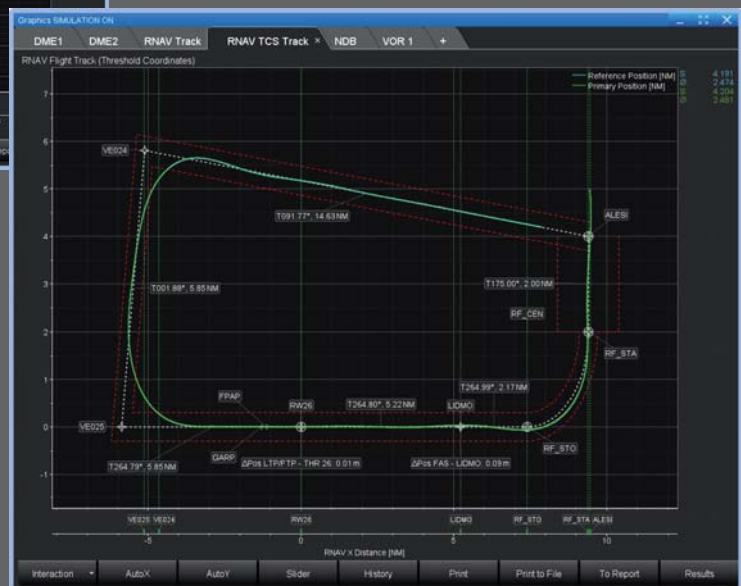

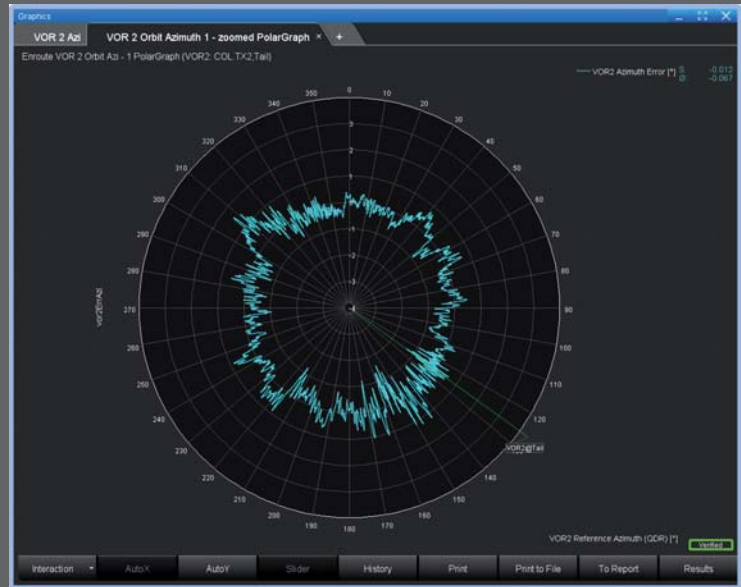

- AeroFIS® can be coupled to the flight director/autopilot for automated flight inspection procedures
- Fully certified by various EASA STC's held by Aerodata AG
- Full support of all flight profiles
- Minimum flight time
- Digital audio & intercom system

AeroFIS® – Always a Step Ahead

Graphical User Interface:

- AeroFIS® is controlled via a windows based user interface, which allows for rapid familiarization with the flight inspection system and ease of use
- The new graphical user interface follows the latest design guidelines for an ergonomic man-machine interface

AeroFIS® — Flight Inspection Systems made by Aerodata

AeroFIS® Enhancements:

- The AeroFIS® is a modular system that can be customized by adding optional enhancements
- The architecture of the system allows the addition of further capabilities and upgrades at any time

AeroFIS® – Full Life Cycle Support

You'll Never Walk Alone:

- Retrofit options for all existing flight inspection systems around the world
- Classroom and on-the-job training by experienced flight inspectors and pilots
- Proven full life-cycle product support and 24/7 hotline
- Individual maintenance concepts
- In-country support
- Access to common spare parts pool for all customers
- Software update service
- Access to global customer network
- Bi-annual AeroFIS® user meeting

AeroFIS® – Turnkey Supplier

All Responsibilities in One Hand:

- Sole manufacturer of flight inspection systems with in-house aircraft integration capability
- One-stop-shopping
- Customized aircraft modification design
- Customized AeroFIS® design and production
- Full capability for integration in aircraft and maintenance at own facilities
- Full responsibility for the flight inspection system and integration in aircraft
- Full responsibility for certification by EASA or FAA STC
- Certification according to national CAA requirements of customers

We keep you on the best path!
